PROFESSIONAL RECOMMENDATION

To Whom It May Concern,

I am pleased to recommend **Lian J. Plasencia**, who reported directly to me as part of the UPS Healthcare End User Development (EUD) team.

Throughout his time on the team, Lian consistently demonstrated professionalism, reliability, and a strong commitment to delivering quality results. He possesses excellent technical skills, learns quickly, takes ownership of his responsibilities, and collaborates effectively with colleagues across different functions.

Lian brought significant value to our team through his positive attitude, strong work ethic, and ability to contribute to both daily operations and project initiatives. He earned the trust and respect of his teammates and leadership alike, and I am confident he will make a meaningful contribution to any organization.

I highly recommend Lian and wish him continued success in his career.

Kind regards,

Rudy Jahan
